Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c). Specifically, alterations to the Residence and Post Office Address of inventor Jeevaratham Suresh have not been initialed.

Nucleotide sequences present in Figures 2 and 3 have not been identified by SEQ ID NO identifiers. Any response to this Office Action that does not include compliance with the Sequence Rules will be considered non-compliant.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by O'Connor et al.

Applicants claim an isolated antibody that binds specifically to an FIV protein.

O'Connor et al. (US 5,177,014, issued 01/05/93, see whole document, particularly column 1, lines 44-68; column 2, lines 1-32; column 4, lines 45-68; column 5, lines 1-64; column 7, lines 9-37 and claims 1-11) recites isolated monoclonal antibodies which specifically bind to various FIV proteins. O'Connor therefore teaches the claimed invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Andersen et al.

Applicants claim an isolated antibody that binds specifically to an FIV protein.

Andersen et al. (US 6,383,765, issued 05/07/02, effective filing date 12/8/89, see whole document, particularly column 7, line 57 to column 9, line 50) recites production and isolation of monoclonal antibodies which specifically bind to FIV proteins. Andersen et al. therefore teaches the claimed invention.

No Claims are allowed.
